

## Scadbury Park Friends Group

The Scadbury Park Friends work across the whole area of Scadbury to improve the park and enhance its biodiversity so that it can be enjoyed by wildlife and visitors alike. We work with London Borough of Bromley's contractor, idverde, to help with maintenance and also liaise with the Orpington District Archaeological Society to protect the heritage within the park. We run a programme of events throughout the year and provide information for visitors through maps, talks, social media and our website.

### Working with the Friends

Come and join us on our weekly outdoor work parties. If you are over 18 and reasonably fit then come along on a Thursday 10am-1pm and/or Saturday 10am-12pm, exact dates and where to meet are on our website. No previous experience required and all tools and equipment are provided.

### Our Biodiversity Projects

We run a variety of projects throughout the year. We regularly survey the population of butterflies and birds and the diversity of plants within the meadows. All help is welcome so please get in touch.

### Communications and Events

Can you help us to organise public events, attend guided walks and local events to promote the friends? If so, we'd love to hear from you. No previous experience required as training is given, but it does help if you are local, interested in the area, outgoing and cheerful!

Help us to help others enjoy our local nature reserve
